

Road safety

“The road our school is on is so busy and the kids are always hyper when we come out of school. My daughter went racing ahead to catch up with my friend and her daughter (walking really sensibly with her Mum!). She was about to jump off the pavement to get in front of them just as a car was flying past really close to the curb. Thank goodness for my friend’s quick reaction yanking her back onto the pavement. So scary!”

Sound familiar? This is just one of the risks of road accidents that could crop up. Here are a few top tips for keeping children safe:

👉 Pedestrians – children have difficulty judging speed and distance until they are at least eight, and older children are still at risk: **the number of children injured as pedestrians peaks at 12** when many children start travelling to and from school on their own.

- Make sure young children know to hold your hand or use walking reins
- Start to teach the Green Cross Code from around the age of five
- Set a good example and avoid dashing across the road
- Remind children not to talk or text on mobiles or listen to music when crossing the road.

👉 In cars – not all car seats fit all cars, and if the seat isn’t right, or fitted incorrectly, your child won’t be as safe as they should be.

- Make sure you use the right car seat for your child’s age, weight and height
- Use a child car seat or booster seat for all children under 135cm and under the age of 12.

👉 Cycling – almost one quarter of the cyclists killed or injured are children. Cycling accidents increase as children grow older, with **10 to 15 year-old riders at greater risk** than other age groups.

- Get your child into the habit of always wearing a helmet when cycling.

👉 Speed – if hit by a car travelling at 40mph, 80 out of 100 child pedestrians will die. If hit by a car travelling at 20mph, 95 out of 100 child pedestrians will survive.

- Keep an eye on your speed – with today’s powerful cars, it’s so easy to creep over the speed limit.

Road safety

Child road injuries peak between 3pm and 7pm. There are more serious and fatal injuries to school-age pedestrians in the afternoon and early evening than at any other time.

CAPT resources for your event

- It's fun to go out but... pictorial booklet
- We can get thrown about in the car poster
- How safe is your child in the car? leaflet
- 5-7s top safety tips leaflet
- 7-11s top safety tips leaflet

Available from CAPT's online shop

www.capt.org.uk/shop

Activity ideas

- Display a selection of items of clothing, of different colours, some reflective and some dark. Ask parents which ones would help their children stay safe around roads at night time.
- Teach children the steps in the Green Cross Code by building your own road using chairs for cars, boxes for buildings and using masking tape to draw out road markings and crossings.
- Ask children to design a road safety mascot and list the safety points he or she would be championing.
- Run a car seat safety check session. Your local road safety, trading standards or community police team may be able to help you with this.
- Demonstrate to older children how easy it is to become distracted. Get them to do something simple like copy text out from a book whilst their friends walk round and round the table talking to them. Then get them to do it without the distraction.
