Science Projects 2018

3rd October 2018

Dear Parents and Carers,

As part of optional home learning, children have the opportunity to complete a Science project. We would like the children to create a Science project either by themselves, with a friend from their year group or a sibling with the maximum group size being 3. Every child who completes a Science project will be able to share their projects during a mini Science Fair in their classroom. The exact dates for each year group will be sent out in a group call.

The project can be an experiment to answer a question, a problem and solution or a research project. It can be on any area of science that interests your child, for example 'How many stars can we see?', 'How does a hovercraft work?' or 'What would my family eat on the ISS if we were with Tim Peake?'

When your child has carried out their investigation or research they have to make a display board to communicate their learning to others. This can be made from a large cardboard box, opened out, painted or covered in wrapping paper and held together with tape. It needs to have three panels of information (as shown) and needs to be free standing.

This display board should show the project title/question/problem, what your child thinks the answer is, what they did to investigate their question, what they found and a conclusion. If they want, they can include a small model or experiment and/or project notes.

All projects need to be in school the week beginning Monday November 5th. Individual year groups will provide further information nearer the time on exact dates.

We look forward to seeing all the exciting ideas that the children will have.

If you have any questions, please speak to your child's class teacher or the Science leader Ms Cronin.
